

2023-2024 Nova Scotia Examination Mathematics 10

About the Examination

Students in Mathematics 10 courses wrote this examination in June 2024. Students completed a series of questions in four units (measurement, algebra and number, relations and functions, and financial mathematics).

Nova Scotia teachers work with the Department of Education and Early Childhood Development to develop this examination, score open response questions, and set the expectation of the examination. The expectation is what students should know and be able to do at the end of the course. Students' examinations were first scored by their teachers in order to incorporate the examination mark into their final course grade. The examination results contribute 20% to students' final course mark. The examinations were then scored at a provincial marking session to provide provincial results.

The examination results will provide:

- teachers with information to inform instructional planning;
- parents and guardians with information on their child's performance;
- the Department of Education and Early Childhood Development and Regional Centres/CSAP with information to inform educational decisions.

These results should be used in combination with other reliable measures of school and classroom achievement.
